PERFETTO 
IL SISTEMA ANTI - INSETTO

HI-PRO-CHEM is an industrial company involved in the design, manufacture and sale of cutting-edge products for the control of pests which may contaminate the food supply chain.

Founded in 2008 to create a technical and commercial synergy with OSD Ecotech Group, a company which produces specific equipment for the professional pest control sector, HPC soon demonstrated its strong innovative approach.

The innumerable research projects for the use of eco-friendly techniques with a low environmental impact led HPC to quickly establish itself as an industry leader.

HPC has a large number of contracts with leading Italian and international companies, each one of which is a leader in its own field of application and market, to exclusively sell their respective product ranges.

LODIGROUP

Russell IPM is the leading manufacturer in the UK and abroad of eco-friendly pheromone-based insect monitoring and control systems for the farming and food industry.

HPC has been a partner and exclusive distributor for Italy of all the Russell IPM product range for over 15 years.

PERFETTO is a fixed and automatic dispensing system which distributes a water-based emulsion in mist form with biocide or repellent products for eliminating mosquitoes.

The PERFETTO system produces excellent results even with very low concentrations of the active ingredient and short dispensing times, keeping consumption well below levels which are harmful to the environment.

4INSECTS

4INSECTS is a new HPC production line, including traps featuring surfaces covered with glue and attractants, designed to capture and trap crawling and flying insects.

Developed for the specific characteristics of the target insect, 4INSECTS integrates perfectly with pest control techniques based on environmentally friendly and sustainable criteria.

DIGI Monitoring

Digimonitoring, developed for the first time in 2006, is one of the first collecting and archiving systems of monitoring data to be marketed.

Entirely designed and produced by OSD and HI-PRO-CHEM technicians, it is an essential tool for professional pest control operators.

**Since 2006
digital archiving of data for professional PCOs.**

HPC has had a prominent role since 2017 in the Biocides sector through the acquisition and 100% total control of FERBI SRL, a chemical company specialised in the development and manufacture of third-party biocides.

HI-PRO-CHEM is:

- **Research**
- **Innovation**
- **Design**
- **Quality**

HPC believes in the professionalism of individuals and so, over the years, has invested in exclusive products which were often precursors of new ideas and work procedures.
